

# **LINXS Event - Membrane Protein workshop: Structural Resolution of Membrane Proteins: From Expression to Sample Preparation**

## **Tuesday 25 May 2021**

### **Session 2 - Chair: Susanna Horsefield (14:00-15:20)**

| time  | [id] title                                                                                                                             | presenter     |
|-------|----------------------------------------------------------------------------------------------------------------------------------------|---------------|
| 14:00 | [27] Keynote talk - An yeast GFP-based platform for functional and structures investigation of SLC transporters                        | DREW, David   |
| 14:40 | [28] Contr. talk - Study of anti-cancer effects of TTA-A2 and paclitaxel due to antagonistic interactions with T-type calcium channels | DALAL, Vikram |
| 15:00 | [29] Contr. talk - Production of insect odorant receptors in yeast for structural studies                                              | SIMS, Cassie  |
