John R. Bargar - Multi-technique synchrotron investigations of complex biogeochemical systems

Wednesday, 20 June 2018 16:25 (40)

Dr. John Bargar is a Lead Scientist, Geochemistry and Biogeochemistry Division, at the Stanford Synchrotron Radiation Laboratory. He has experience in low-temperature geochemistry, biogeochemistry, and synchrotron-based x-ray spectroscopy, spectromicroscopy, and scattering techniques, laboratory and field systems. His research interests include biogeochemistry of redox active metals and light elements, structure and reactivity of biogenic nanominerals, and mineral-water interface geochemistry.

Presenter(s) : Dr. R. BARGAR, John (SLAC lead PI,Stanford)
